How do I verify this document?

- Navigate in your browser to <https://app.sproof.io>
- Upload by clicking  or drag and drop this file into the app

What is sproof?

sproof revolutionizes the way we secure digital documents and data by creating a unique digital signature for each document. We use the power of decentralization to make issuing, revoking and verifying digital documents easy, fast and secure.

sproof provides an easy to use API that can be integrated in any application for digitally signing important documents.
